Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

After a careful examination of the Applicants' argument, the Examiner has made a new ground of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Conzelman, Jr. et al US 2,656,545 in view of Haslam, II et al US Patent 5,413,611.

Conzelman, Jr. et al discloses a grip device (25), a plurality of digits (32), digit tip pads (see Fig. 1) with a pouch (155) connected to the end of each digit and a hydrostatic fluid filling the pouch (157). However, Conzelman, Jr. et al is silent regarding a drive linkage.

Conzelman, Jr. et al discloses, in col. 1, lines 42-55 and col. 2, lines 1-13, a prosthetic device capable of having a powerful grip when closing the artificial hand. Therefore, the prosthetic device has to have a drive linkage so it is capable of closing the digits. However, the Examiner is disclosing a reference in order to show that is well known in the art to use a drive linkage.

Haslam, II et al teaches a prosthetic device comprising a drive linkage (see Fig. 1) and having a plurality of strain sensors (35, 36 & 37) at the tip of each digit for the purpose of

closing the hand and sensing the amount of stress in the fingers and thumb (see col. 7, lines 15-22).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Conzelman, Jr. et al reference with the Haslam, Jr. et al reference in order to close the hand and sense the amount of stress in the digits.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alvin J Stewart whose telephone number is 703-305-0277. The examiner can normally be reached on Monday-Friday 7:00AM-5:30PM(1 Friday B-week off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 703-308-2111. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
